

Strive

Consistency over intensity.

A CALM, AI-FIRST HABIT TRACKER

THE PROBLEM

You missed one day. The
streak resets. You quit.

The retention mechanic is the churn mechanic. Guilt is the number one reason people abandon habit apps.

THE SOLUTION

Momentum that decays slowly, **never** **resets to zero.**

Weekly targets, not all-or-nothing days. A calm
coach, not a drill sergeant.

THE PRODUCT

Rhythm: today's rituals at a glance.

AI chat: log in your own words.

Circles: shared, never competitive.

INSIGHTS · PREMIUM

Your history, understood.

Weekly and monthly cards surface the patterns in your own rhythm. **The AI never invents a number.** It only phrases what your data already proves.

CORRELATION

Sleep and Sport move together.

In weeks you log Sleep 5+ days, Sport completion rises 24%.

Last 8 weeks

STRENGTH

Read 30 min is your anchor.

Logged 82% of weeks, your steadiest ritual.

Last 12 weeks

CIRCLES

Accountability, without the competition.

Share a few rituals with people you trust. A single gentle nudge, never a leaderboard, never a score.

WHY STRIVE

Three pillars

01

Flexible targets

Miss a day, still win the week.

02

Zero-friction logging

One tap, or just tell the AI.

03

Momentum, not streaks

Progress that decays slowly, never resets to zero.
